SUMMARY

Passionate Front-End Developer with 1+ year of hands-on experience building modern, scalable, and high-performance web applications using React.js and Next.js. Experienced in SSR/SSG, REST API integration, state management, and performance optimization. Strong team collaborator with real-world production experience and effective use of AI-powered development tools to enhance productivity.

WORK EXPERIENCE

Junior Software Engineer, Datascape IT — Dhaka, Bangladesh **Dec 2024 – Oct 2025**

- Develop responsive and user-friendly web applications using React.js and Next.js
- Implement SSR and SSG using Next.js best practices
- Integrate RESTful APIs and manage data using React Query (TanStack Query)
- Optimize performance using lazy loading, code splitting, and image optimization
- Collaborate closely with backend developers and UI/UX designers
- Maintain clean, reusable, and modular codebases
- Use Git/GitHub for version control and team collaboration
- Utilize AI tools (ChatGPT, Copilot) to improve development speed and code quality

Frontend Developer, Nano kingfisher — Mymenshingh, Bangladesh **Nov 2025 - Present**

- Built interactive, reusable UI components using React.js, following component-based architecture
- Converted Figma/UI designs into fully responsive layouts using Tailwind CSS and modern CSS practices
- Integrated REST APIs and implemented authentication flows (login, signup, protected routes)
- Managed application state using React Context / Redux where applicable
- Improved application performance through component optimization and efficient re-rendering
- Ensured accessibility (a11y) and cross-browser compatibility
- Collaborated in an Agile, team-based environment using Git/GitHub and regular code reviews
- Debugged UI issues and enhanced overall user experience
